

meta:Human – The Dark Ages of Technology

Deadliest Species

Our mother has been abused once again
But our financial system declared:
“It was just in time”
An unwritten law dictates all of our lives

Only the deadliest of all species will survive

So, we had to invent our masterplan
To prevent all resources to be shared
Outnumbered and backs against the wall
Still, hunger is fought with knives

Only the deadliest of all species will survive

Armed to the maximum of possibilities
Jesus saves only their productivity
No more knights in shiny armour
The cross is burning and everything dies

Only the deadliest of all species will survive

Motormusic

Black oil is pumped through my veins
And my engines noise drives me quite insane
Breath – deeper in the scent of my gasoline
Guess: your whole world swings to my

Motormusicmonstermachine

My heart is made of stainless steel
It's the final overdrive with our hands upon the wheels

Breath – deeper in the scent of my gasoline
Guess: your whole world swings to my

Motormusicmonstermachine

Turn me on and kick-start my heart
I want to feel your lubricant poured all over my parts
Breath – deeper in the scent of my gasoline
Guess: your whole world swings to my

Motormusicmonstermachine

We are exceeding the speed-limit in our life
Fast and furious, nearly delirious – restless and wild
Breath – deeper in the scent of my gasoline
Guess: your whole world swings to my

Motormusicmonstermachine

Ages

Spotlight to the centre stage
Accelerate – time has been sold out
What happened to our yesterdays
Someone else`s frames – it is getting loud
(so loud!)

We must scream, but our tongues have been cut out

Walk on through their killing fields
Democracy lives in our homes
A cross is placed at the wall
In a universe so big – we are quite small

We must scream, but our tongues have been cut out

Watch the cursor moving up and round
In this restless world I can`t come down
Mother destruction goes pregnant by hate
But I guess – it is our fate

We must scream, but our tongues have been cut out

Like fire

All you superheroes
Thrown like stones
Over the surface
Of the sea of life

Love like fire and burn everything outside

Walk that reptile walk
This dragon is eating me alive
I wonder what shows up next
Welcome to the age of strife

Love like fire and burn everything outside

Bomb my precious heart
Still no formula
To remove these walls
Coming closer at night

Love like fire and burn everything outside

Like peeling off more skin
I dissolve myself
Every time
I give in

Love like fire and burn everything outside

How we love

Sometimes it seems like all we really
Have to believe in is the call of our wildest dreams
While we walk asleep inside ourselves
It's the root where all the fire belongs in this world

It's where you came from
Together we now walk on

The worst scene is yet to come
They finally found out how to love
Under the gods above
Under the gods above

Souls stripped down to the bones while we wait at home
Her angel like overcome
Throws us against the manmade walls

It's the root where all the fire belongs in this world
It's where you came from
Together we now walk on

The worst scene is yet to come
They finally found out how to love
Under the gods above
Under the gods above

The beast inside moves it's ugly head once again
Strengthens the grip around our necks
Breaks our bodies in to ten million parts

It's the root where all the fire belongs in this world
It's where you came from
Together we now walk on

The worst scene is yet to come
They finally found out how to love
Under the gods above
Under the gods above

Press enter and push the escape to eject
Orgasmic detonation, an inner light comes true
Be aware of the power she gave to you
It's the root where all the fire belongs in this world

It's the root where all the fire belongs in this world
It's where you came from
Together we now walk on

...

The worst scene is yet to come
They finally found out how to love
Under the gods above
Under the gods above

...

Devote

Our journey started early in the morning
We`ve got driven far beyond world`s border
Follow the highway-star up the grim north
The needle goes zero, another traveller is missing

Looking at all of this – what we`ve gotten here

From dusk `till dawn we walked with our boots on
Laughing about the deadliest of all jokes
Follow the highway-star up the grim north
The needle goes zero, another traveller is missing

Looking at all of this – what we`ve gotten here

No trespassing on the road we are all on
Zombies are lurking when we`ve turned out wrong
Follow the highway-star up the grim north
The needle goes zero, another traveller is missing

Looking at all of this – what we`ve gotten here

Super-highway-outlaws love to drive their fast cars
And Satan says: “you`ve got to keep your motor clean!”
Follow the highway-star up the grim north
The needle goes zero, another traveller is missing

Looking at all of this – what we`ve gotten here

Rivers of dawn

Take a bath in the tears
At the sea close to infinity
If not we – who else
Could save us from ourselves

Love conquers it all at the rivers of dawn
Halls are empty – every step is echoing

Hands reach out to touch
The heart of the mother beast
Her fire ignites only
to be extinguished by your water

Love conquers it all at the rivers of dawn
Halls are empty – every step is echoing

Fear is poisoning our veins
Like heroin – addicted to tear everything apart
What we love is what we know
And what we know has been already avoided

Love conquers it all at the rivers of dawn
Halls are empty – every step is echoing

Tree of Souls

There is a garden surrounded by walls
And a sign at the gate of dawn
That says: "forget all of your hopes,
For there is no place where we will go to!"

Let's climb over that barb wire fence
And wonder what awaits us inside
Flowers of every colour and heavenly beauty
But an empty chair under the dead bowels

Of the tree of souls

No reincarnations can longer been made
The train of live stopped running the rails
From somewhere erupts the final call
It invites us all to be guests of our last show

Take another smart copper nail
From point blank you won't fail
To drive it deeper into the flesh of live
It's long forgotten what we've already known

We give acid to drink instead of water
And our scientists did think it won't change
The flow of her cosmic majesty
But a dollar bill now thrones under the dead bowels

Of the tree of souls

Catching up

It's catching up – from the underground of our heart

Something's going wrong
In the world of nowadays
Like cattle in front of the water place
Awaiting their final doom

Your meat feeds our brain
Give us something else to believe in
The time has come to worship
Another god's chosen son – but you will be nailed again

At the cross of dawn

Touch the light of your TV screen
Be inside this commercial machine
Carved with symbols unknown
Still – magic is forbidden in their factory halls

Read the small letters carefully
This world spins but the bank will always win
Chains unbroken will grow stronger
Unless we say no to the religion of productivity

They give us illusions
Instead of our life
Enforce everyone to play their game
But our cards have been over painted

Fear is the strongest weapon
In every house a loaded gun
While cameras recording the way we act
So no one can say – I haven't known what's been going on

Magnitude

Something`s goin` on- I can clearly taste it on my tongue
Hands up! – who wants to be my motor slave?
Drinkin` virgins blood `till we get so beautiful insane
The burning of men shows us the end of our days

All of your messiahs` truth
Jerk off my freak magnitude

Now that we drove all night long
Still the radio plays the same old song – sha-la-la-la-la-la-la-la-la-la
Bathing in virgins blood `till we get so beautiful insane
The burning of men shows us the end of our days

All of your messiahs` truth
Jerk off my freak magnitude

Solve the puzzle of your life and win a one way trip
Through purgatories fire – back and forth
Be my virgins blood `till we get so beautiful insane
The burning of men shows us the end of our days

All of your messiahs` truth
Jerk off my freak magnitude

Terminal D

Your soul have been sold
Take the freedom of corruption
Now vote another time
But don't accept anything to move

Because we all groove
To the sound of the golden lamb

A new dawn breaks on
Press the esc. For help
History is repeating once again
We think we are so clever and smooth

The tree of life has been already burnt
Genetic information altered and gave birth again
Demons we summoned won't just return
An act of deceiving is an act of proof

The prophet steps out and dies today
His heart wasn't pure to face the light anyway
When all water's poisoned by our hands
Comes the time of the final judgement of truth

Behind thick walls of global economy
Is the feast only for those above
All others stay out in the acid rain
Revolution number nine is eternal youth

Devils

Last night America saved my live
As they started the war
Against all bad guys
Walking the axis of terror

Now I don't feel safe anymore
In the world we are inheriting
Don't like their smokestacks
Nor, the men who are feeding

Devils are made of lies
But it's always your heart to be sacrificed

Last night America saved my live
As they gone to war
Against all non-christian oilers
In god we trust, but we love our cars

So, do you feel safe anymore?
In this world we are inheriting
Don't like the way it is
Nor, it's the way I am seeking

Devils are made of lies
But it's always your heart to be sacrificed

Last night America saved my live
As they started the war
In the name of the lord
Hail to you, Mr. President

Now, I don't feel safe anymore
You'll make life like a glasshouse
By every stone you've thrown
You suck more blood from those still bleeding

Devils are made of lies
But it's always your heart to be sacrificed

Last night America saved my live
As they brought war
To every TV's home
Switch back to the shopping channel

Now, I don't feel safe anymore
In this world they're trying to sell
Every ring-ring has its bell
I'm cutting now the circuit

Devils are made of lies
But it's always your heart to be sacrificed

Cured

Infested – a brain bug is suckin` off my thoughts
Suggested – this bug is of no human source
And they won`t come to give
`cause their mission is named: “how to panic” our cities

And find a cure against humanity

Riots start another evolutionary outcome
Did you really thought no one would drop another bomb?
And they won`t come to give
`cause their mission is named: “how to panic” our cities

And find a cure against humanity

Enter with me the darkest age of technology
A world of strife with no inner harmony
And they won`t come to give
`cause their mission is named: “how to panic” our cities

And find a cure against humanity

You are the cancer – this is your surgeon
Total devastation until Armageddon
And we won`t come to give
`cause our mission is named: “how to panic” your cities

And find a cure against humanity
